SUMMARY

Experienced Software Engineer with a background of 2 years in a multinational company, pursuing Master of Science in Computer Science from Rutgers University-New Brunswick. Determined to work with a growing organization that directs and provides a scope to upgrade my skills.

EDUCATION

Master of Science in Computer Science

Rutgers University • New Brunswick, New Jersey • 2023 • GPA – 3.83/4

Bachelors in Electronics and Telecommunications

University of Mumbai • India • May 2019 • Courses: Discrete Mathematics, Operating Systems, Object Oriented Programming. GPA : 7.4/10

SKILLS

Programming Languages: Python, Java, SQL, JavaScript, HTML, CSS, Node.js, PHP, R, XML

Tools, Technologies and Frameworks: Spring Boot, Android Studio, Flask, Arduino, Git, Microsoft Azure, MATLAB, Excel (VBA), NumPy, Oracle DB, UFT, Selenium

EXPERIENCE

Graduate Teaching Assistant and Grader

Rutgers, State University of New Jersey

September 2021 – Present, New Brunswick

- Produced and provided subject material to undergraduate students under the guided direction of faculty members, using lectures and discussions for the course CS142 Data 101 – Data Literacy.
- Delivered lectures, reviewed, and graded weekly assignments, papers, and exams of 35+ students.
- Conducted weekly office hours to assist students with projects, exam preparation, assignments, and solved queries.

Software Engineer

Tata Consultancy Services

July 2019 – August 2021, Mumbai, India

- Developed, and facilitated maintenance of Governance Risk Compliance Applications for an oil and gas company which was delivered to a team of 200 people.
- Designed database schemas and ER diagrams for relational databases and wrote complex SQL queries for transaction-heavy, energy domain applications.
- Constructed 12 APIs and 6 microservices application using Spring Boot.
- Coded 150+ VBScripts for automation of applications and SAP systems using UFT, and wrote scripts in Java using Selenium resulting in 100% client satisfaction.

Summer Intern

Air India Airlines

December 2017 – January 2018, Mumbai, India

- Authored a VBA application to automatically generate a PowerPoint Presentation with embedded graphs and charts, accessed from Excel Sheets containing raw flight data records, crew utilization, fuel utilization which contained records of about 80 flights.
- Mapped out an Excel dashboard to analyze data-driven Excel sheets, automatically making new graphs and sheets to help streamline and automate internal processes resulting in 30% labor-saving.

PROJECTS

Web Query Application

Rutgers University • September 2021 – December 2021

- Performed ETL (Extraction, Transformation, and Loading of data), conceptualized and created ER diagrams, database schemas, and normalized the databases.
- Architected and implemented a web application for the purpose of querying the databases for 4 DBMS.
- The Database Management Systems used for querying were: 1) MySQL 2) MSSQL 3) RedShift 4) MongoDB.
- Features included displaying the result and downloading it in CSV format, calculating and displaying the time elapsed, presenting the ER diagram in order to make writing SQL queries effortless.

Face Recognition Web App with Machine Learning in Flask

August 2021

- Computed a pipeline model for deploying the web application with a 200k dataset size.
- Generated a machine learning model with 84% accuracy of the algorithm, and built REST Application Programming Interfaces (API) in Flask.
- Prepared a web server gateway interface in Flask by rendering HTML, CSS, and bootstrap in the frontend and in the backend using Python.

Social Networking Hub for Students and Faculty (RAIT+)

May 2019

- Utilized Java for backend and MySQL for creating databases containing data of 600 faculty members and 5000 students.
- Implemented messaging feature in the application which handled 50k records per minute for which utilized the services of Google Firebase to create a real-time database.
